

learning java

20190610

1. ~~Preface~~
2. ~~Introduction to Objects~~

20190611

1. ~~Everything Is an object~~
2. Operators

```
if you want to compare the actual contents of an object for equivalence?  
You must use  
the special method equals( ) that exists for all objects (not primitives,  
which work fine with  
== and !=)
```
